

Online Refresher Course on Computational Sociology

October 07 – 20 ,2020

HRDC, Pt. Ravishankar Shukla University, Raipur C.G.

The UGC-HRDC, PRSU, Raipur, Chhattisgarh is organizing an Online multidisciplinary Refresher Course in Computational Sociology (Recent Trends and Challenges) during October 07-20, 2020 between 10:30 to 17:30 for college and university teachers of social sciences.

Objective: In the era of digital humanities, there has been paradigm shift from qualitative to quantitative understanding and usage of computationally intensive methods to analyze and model social phenomena. Computational Sociology focuses on investigating social and behavioral relationships and interactions through social simulation, modeling, network analysis, and media analysis. It helps in recreating social conventions and social contexts through the use of software and technology. This online course has been designed to provide insight into a variety of interesting and meaningful topics which would be useful for all the social science teachers irrespective of their specializations.

Course Module: Introduction to computational sociology, research design and hypothesis testing, qualitative v/s quantitative research in social science, trends in social and behavioural research, computer simulation and modeling in social science research, scaling methods, SPSS and its application in social research, analysis and interpretation of quantitative data in social science research, social networks and computer simulations.

Target Group: All regular faculties of Universities/ Colleges that are included under section 2 (f) of the UGC act. The teachers of the colleges affiliated to the University for at least five years can participate.

Refresher Course - Computational Sociology

Title - Formulation of Research problem

The image shows a Zoom meeting interface. The main content is a presentation slide titled "Formulation of Research problem". The slide lists several bullet points and a numbered list. The first bullet point asks "What is formulation?". The second bullet point states that a research problem should be translated and transformed into a scientific researchable question. The third bullet point notes that the formulation should specify exactly what the research problem is and why it is to be studied. The fourth bullet point mentions that the formulation should include what and why aspects. The fifth bullet point states that proper formulation of a research problem is the most important aspect. The sixth bullet point refers to Merton's R.L. theory, identifying three principal components in the formulation of a research problem: 1. The Originating Question (What one wants to know?), 2. The Rationale of the question (why aspect), and 3. The Specifying question (possible answer to the originating question).
